Commissioning

PROJECT HIGHLIGHTS

TEK's turnkey delivery on the Gibraltar M&R station consists of three acres of tree clearing, site civil work, excavation of 10,000 yards of spoil, and tying into CPG's TECO yard with 880 feet of lateral pipeline interconnect featuring an open-cut creek and road crossing. The construction of this 300 MCF per day M&R station capitalizes on TEK's expertise in data point collection for job book creation, setting the standard for job book submissions.
